

Neoventech, 675 US Rt1, NJ Bioscience

North Brunswick, NJ 08902

Job Title: R&D Intern

Job Description:

Neoventech is a drug development and service technology company focusing on improvements in new topical drug development and commercialization. This company is looking for a R&D Intern working in the product development and analytical measurements, with an interest in drug delivery research. The intern will be responsible for assisting the research scientists at Neoventech with their current R&D development, as well as to conduct a small independent research project. Opportunities to develop skills in drug product development, using various advanced analytical instrumentation, and project management.

Required Qualifications:

Highly motivated and good communication skills, current undergraduate or graduate students seeking a degree in Chemistry, Biology, Material Science or a related field. Some lab experience in a wet or analytical/bioanalytical lab environment.

Compensation & Schedule:

Pay commensurate with experience. 10-20 hours a week or negotiable

Anticipated Start Date:

As soon as possible

To Apply: Send Resume and Cover Letter to jwu@neoventech.com, or call 267-261-6611 (cell) (609) 921-6092 (Office)
